

**Proposed Amendment to
Market Rules for
“Dispatch Data Change Lead Time”
Revised from 2 Hours to 1 Hour**

Market Rules and Procedures Amended:

- **Market Rule 6.10.5B**

Reasons for Amendments

NBSO proposes to further reduce the lead time required for changes to Dispatch Data in order to further increase the opportunity for Market Participants to respond to changing market and operational conditions. The proposed change would revise the required lead time on revisions to dispatch data from 2 hours to 1 hour.

Amendments

A version of the affected Market Rule with additions underlined and deletions struck out is immediately followed by the amended Rule as it would now read.

6.10.5B A Market Participant for a Generation Facility may at any time submit to the SO revisions to its Dispatch Data for hours commencing more than ~~2~~ 1 hours after the submission of such revisions. Such changes shall be restricted to changes in P(1) to P(nmax) and Q(1) to Q(nmax). The SO shall approve such requests unless the SO determines that such a change would threaten the Reliability of the SO controlled grid.

6.10.5B A Market Participant for a Generation Facility may at any time submit to the SO revisions to its Dispatch Data for hours commencing more than 1 hour after the submission of such revisions. Such changes shall be restricted to changes in P(1) to P(nmax) and Q(1) to Q(nmax). The SO shall approve such requests unless the SO determines that such a change would threaten the Reliability of the SO controlled grid.
